

It Pays To Have CPW Natural Gas

Policy for Promotion of Natural Gas Usage by Residential Owners and Builders Installing New Natural Gas Appliances

I. Purpose

The purpose of this policy is to promote the use of natural gas through the use of incentives for installing natural gas appliances. This policy applies only to residential owners and builders installing new natural gas appliances using CPW natural gas.

II. Installation of Natural Gas Appliances

The following incentives shall be offered for residential owners and builders choosing to install new natural gas appliances in new homes or in existing homes or to replace appliances, whether such appliances being replaced use natural gas, electricity or other power sources.

APPLIANCE INSTALLED	INCENTIVE
Natural Gas Heat As Primary Heat Source*	\$450.00
Natural Gas Water Heater	150.00

If both Natural Gas heat, as Primary Heat Source, and water heater are currently in place or are installed and are using CPW natural gas, the following incentives apply for installing or replacing, the following additional appliances:

APPLIANCE INSTALLED	INCENTIVE
Natural Gas Cooking Range	\$50.00
Natural Gas Dryer	50.00
Natural Gas Light	50.00

****“Primary Heat Source”** shall be defined so as to be limited to a gas pack, gas furnace, or gas space heater, provided such heat source has a minimum rating of 50,000 BTUs. Other heat sources may qualify as a “Primary Heat Source” if CPW gives written approval in advance.

Gas as auxiliary heat for a heat pump, gas logs, or similar types of heat DO NOT qualify as a “Primary Heat Source”.

In the case of a natural gas primary heat source or natural gas water heating unit or units of 100,000 BTU or more being installed in a single residential structure, incentives will be paid for each increment of 50,000 BTUs.

(For example, a builder or residential owner installing two units, one with 60,000 BTU and one of 40,000 BTU, or a single unit of 100,000 BTU, would be eligible for incentives totaling \$900 since the units equal 100,000 BTU. Similarly, a builder or residential owner installing three units, one of 50,000 BTU and two of 40,000 BTU would likewise be eligible for two incentives totaling \$900 since the three units add up to 130,000 BTU, meeting two increments of 50,000 BTU but not a third increment. An incentive will be paid for each natural gas water heater installation regardless of size, however, if a unit is 100,000 BTU or over, incentives will be paid for each increment of 50,000 BTUs.

III. Disbursement

When appliance(s) are connected to CPW natural gas and turned on, incentive(s) will be paid to builder (for new construction) or to homeowner (for existing homes), (provided the builder or residential owner does not have any past due or delinquent bills with CPW, in which case, the incentive will be applied first to any amount owed to CPW). Proof of purchase (if applicable), installation and service connection must be verified by CPW prior to payment of any incentive. Such proof must be provided to CPW, to its satisfaction, within six (6) months after installation of the gas appliance in order for the residential owner or builder to receive any incentive.

IV. Effective Date

This Policy will be effective for natural gas appliances installed after January 13, 2011. This Promotion Policy may not be relied upon by any person and may be discontinued or modified at any time by CPW without notice.
